WORK EXPERIENCE

ADVOCO

2018 April – 2020 July

SYSTEM ADMINISTRATOR

Advoco is a Voice over IP provider for small to medium sized businesses in Sweden, with around 30 000 daily users. I worked as a sysadmin in a mixed Windows and Linux environment.

- Networking. Mainly HP layer 2 switches and Fortinet firewalls.
- Virtualization with VMWare, vCenter and Simplivity.
- DNS. Maintaining and settings up internal and public Debian BIND and Windows DNS servers.
- Scripting and automation in Bash and Powershell.
- Elastic. Setting up and maintaining an Elastic cluster for aggregation and searching of logs.
- Monitoring and alerting with PRTG with over 1500 sensors.
- Troubleshooting and analysis of telephony and application logs using Wireshark and grep.
- Backup and disaster recovery.
- Datacenter. Installing and maintaning servers and network equipment.

AXFOOD

2016 November – 2017 September

FRONT END DEVELOPER

I worked with developing Hemköps and Willys e-commerce store.

- Javascript (AngularJS)
- CSS (Sass)
- Google Analytics
